Tasks.txt

1. Fill with a team line (Add a team to a competition)
   1381,start,FillWithTeam,1383,1,687,0

   a) Competition object ID in Compobj.txt (e.g. 1381)
   b) Task is to happen at the start (e.g. start)
   c) Task description add team to a competition (e.g. FillWithTeam)
   d) Group line ID in Compobj.txt (e.g. 1383)
   e) Task order numbering for this type of line starts with 1 (e.g. 1)
   f) Team ID to add to the competition (e.g. 687)
   g) Parameter always equal 0 (e.g. 0)

2. Fill with a special team line (Add a special team to a competition. The special teams can be from the rest of the world league)
   121,start,FillFromSpecialTeams,125,2,0,0

   a) Competition object ID in Compobj.txt (e.g. 121)
   b) Task is to happen at the start (e.g. start)
   c) Task description add a special team to a competition (e.g. FillFromSpecialTeams)
   d) Group line ID in Compobj.txt (e.g. 125)
   e) Number of special teams to add. Special team IDs are specified in settings.txt (e.g. 2)
   f) Parameter always equal 0 (e.g. 0)
   g) Parameter always equal 0 (e.g. 0)

3. Fill with teams from a league line (Add league teams to a competition)
   303,start,FillFromLeague,305,80,0,0

   a) Competition object ID in Compobj.txt (e.g. 303)
   b) Task is to happen at the start (e.g. start)
   c) Task description add all teams to a competition from a league (e.g. FillFromLeague)
   d) Group line ID in Compobj.txt (e.g. 305)
   e) League ID. This can be found in the database. (e.g. 80)
   f) Parameter always equal 0 (e.g. 0)
   g) Parameter always equal 0 (e.g. 0)

4. Fill with teams from a league with maximum specified teams line (Add league teams to a competition with a maximum teams from the country specified)
185,start,FillFromLeagueMaxFromCountry,189,13,1,4

   a) Competition object ID in Compobj.txt (e.g. 185)
   b) Task is to happen at the start (e.g. start)
   c) Task description add some teams from a league to a competition with a maximum number of teams from the country (e.g. FillFromLeagueMaxFromCountry)
   d) Group line ID in Compobj.txt (e.g. 189)
   e) League ID. This can be found in the database. (e.g. 13)
   f) Number of teams from the league in order starting from the first position (e.g. 1)
   g) Maximum number of teams from this country (e.g. 4)

5. Fill with teams from a competition table line (Add teams from one competition to another competition. This table has to be specified in Inittems.txt)
118,start,FillFromCompTable,120,185,1,0

   a) Competition object ID in Compobj.txt (e.g. 118)
   b) Task is to happen at the start (e.g. start)
   c) Task description add a team to a competition from another competition (e.g. FillFromCompTable)
   d) Group line ID in Compobj.txt where to put the teams (e.g. 120)
   e) Competition object ID form where teams to come from in Initteams.txt (e.g. 185)
   f) Number of teams to the competition (e.g. 1)
   g) Parameter always equal 0 (e.g. 0)

6. Fill with teams from a competition table and have a backup league (Add teams as a backup from a league. For example one team qualifies through two competitions and backup team is required to fill the spot. This table has to be specified in Inittems.txt)
185,start,FillFromCompTableBackupLeague,188,1261,53,1

   a) Competition object ID in Compobj.txt (e.g. 185)
   b) Task is to happen at the start (e.g. start)
   c) Task description add a team to a competition from a competition and have a backup league spot (e.g. FillFromCompTableBackupLeague)
   d) Group line ID in Compobj.txt where to put the teams (e.g. 188)
   e) Competition object ID form where teams to come from in Initteams.txt (e.g. 1261)
   f) Backup League ID where the teams to come from in case backup is needed. This can be found in the database. (e.g. 53)
   g) Number of teams to the competition (e.g. 1)

7. Fill with teams from a competition table backup line (Add teams as a backup solution. For example one team qualifies through two competitions and backup team is required to fill the spot. This table has to be specified in Inittems.txt)
1026,start,FillFromCompTableBackup,1028,1029,1083,1

   a) Competition object ID in Compobj.txt (e.g. 1026)
   b) Task is to happen at the start (e.g. start)
   c) Task description add a team to a competition as backup to a league spot (e.g. FillFromCompTableBackup)
   d) Group line ID in Compobj.txt where to put the team (e.g. 1028)
   e) Competition object ID form where teams to come from in Initteams.txt (e.g. 1029)
   f) Backup Competition object ID from Initteams.txt where the teams to come from in case backup is needed. (e.g. 1083)
   g) Number of teams to the competition (e.g. 1)

8. Update table (Update table of teams at the end of the competition for the next season that are drawn from Initteams.txt in the first season)
303,end,UpdateTable,303,305,5,5

   a) Competition object ID in Compobj.txt (e.g. 303)
   b) Task is to happen at the end (e.g. end)
   c) Task description update the table (e.g. UpdateTable)
   d) Competition object ID in initteams.txt (e.g. 303)
   h) Group object ID from where the team is to replace the team from initteams.txt (e.g. 305)
   e) Group object ID position from where the team is to replace the team from initteams.txt (e.g. 5)
   f) Position of the updated team to replace the team from initteams.txt (e.g. 5)

9. Update league table (Update table at the end of the competition for the next season)
303,end,UpdateLeagueTable,304,80,0,0

   g) Competition object ID in Compobj.txt (e.g. 303)
   h) Task is to happen at the end (e.g. end)
   i) Task description update the league table (e.g. UpdateLeagueTable)
   j) League line ID in Compobj.txt (e.g. 304)
   k) League ID. This can be found in the database. (e.g. 80)
   l) Parameter always equal 0 (e.g. 0)
   m) Parameter always equal 0 (e.g. 0)

Analyze some existing lines:

1381,start,FillWithTeam,1383,1,687,0 (Competition ID "1381,3,C234,TrophyName_Abbr15_234,1380" From LanguageStrings this is the U.S. Open Cup, task is performed at the start, add team to a competition, add team to a Competition Group ID in setup stage "1383,5,G1, ,1382" this is the first task to perform for this competition, Team ID 687 is to be added this team is Columbus Crew from the database)

1381,start,FillWithTeam,1383,2,688,0 (Competition ID "1381,3,C234,TrophyName_Abbr15_234,1380" From LanguageStrings this is the U.S. Open Cup, task is performed at the start, add team to a competition, add team to a Competition Group ID in setup stage "1383,5,G1, ,1382" this is the second task to perform for this competition, Team ID 688 is to be added this team is D.C. United from the database)

185,start,FillFromSpecialTeams,189,1,0,0 (Competition ID "185,3,C224,TrophyName_Abbr15_224,70" From LanguageStrings this is the Euro League, task is performed at the start, add a special team to a competition, add team to a Competition Group ID setup stage group 3 "189,5,G3, ,186", add one team out of the specified special team, Team IDs specified in settings.txt are 1884=Panathinaicos, 278=AEK Athens, 280=Olimpiacos, 393=Paok)

303,start,FillFromLeague,305,80,0,0 (Competition ID "303,3,C80,TrophyName_Abbr15_80,286" From LanguageStrings this is the Austrian Bundesliga, task is performed at the start, add teams from a league to a competition, add team to a Competition Group ID setup stage "305,5,G1, ,304", add teams from a League ID 80. League from the database is the Austrian Bundesliga)

185,start,FillFromLeagueMaxFromCountry,189,13,1,4 (Competition ID "185,3,C224,TrophyName_Abbr15_224,70" From LanguageStrings this is the Euro League, task is performed at the start, add teams from a league to a competition, add team to a Competition Group ID setup stage group 3 "189,5,G3, ,186"add teams from a League ID 13. League from the database is the English Premier league, add one team, maximum 4 teams from this country)

118,start,FillFromCompTable,120,185,1,0 (Competition ID "118,3,C232,TrophyName_Abbr15_232,70" From LanguageStrings this is the Copa Europe, task is performed at the start, add teams from a competition Initteams.txt table, add teams to a Competition Group ID Final Setup "120,5,G1, ,119", add teams from a Competition ID 185. From LanguageStrings this is the Euro League, add 1 team)

185,start,FillFromCompTableBackupLeague,188,1261,53,1 (Competition ID "185,3,C224,TrophyName_Abbr15_224,70" From LanguageStrings this is the Euro League, task is performed at the start, add team from a competition Initteams.txt table with a specified backup league, add team to a Competition Group ID setup stage group 2 "188,5,G2, ,186"add team from Competition ID "1261,3,C208,TrophyName_Abbr15_208,1257" From LanguageStrings this is the Spanish Cup, the backup qualifying league is League ID 53 From the database this is Spanish Primera Division, add 1 team)

1026,start,FillFromCompTableBackup,1028,1029,1083,1 (Competition ID "105,3,C981,TrophyName_Abbr15_981,70" From LanguageStrings this is the Supercoppa, task is performed at the start, add team from a competition Initteams.txt table with a specified backup competition, add team to a Competition Group ID setup stage group 1 "1028,5,G1, ,1027"add team from Competition ID "1029,3,C210,TrophyName_Abbr15_210,1025" From LanguageStrings this is Coppa Nazionale, backup qualifying competition is Competition ID "1083,3,C31,TrophyName_Abbr15_31,1025" From LanguageStrings this is Serie A, add 1 team)

307,end,UpdateTable,307,328,2,2 (Competition ID "307,3,C213,TrophyName_Abbr15_213,306" From LanguageStrings this is Coupe Belgique, task is performed at the end, update the table, competition object ID in initteams.txt is 307, table is to be updated from the cup final Group ID "328,5,G1, ,327", team from group second position is to replace first season team in initteams.txt, team position in initteam.txt to be updated is second position)

303,end,UpdateLeagueTable,304,80,0,0 (Competition ID "303,3,C80,TrophyName_Abbr15_80,286" From LanguageStrings this is the Austrina Bundesliga, task is performed at the end, update the league table, update League object_ID "304,4,S1,FCE_League_Stage,303", the League ID is 80. League from the database is the Austrian Bundesliga)
